cleaner fluids mean better business

Filtration and Contamination Control Specialists

## RCI FP4000 Fuel Purifier

### Function

The RCI Technologies purifier is a simple one step unit that removes 99% of water and 95% to 98% of heavy particulates, down to approximately 10 microns. Even today's "clean" diesel fuel will easily become contaminated during transportation and storage. Unlike all other products on the market, the RCI

Technologies purifier performs this function without the use of a replaceable, changeable, or cleanable filter element, cartridge or bowl.

By removing contamination immediately before the fuel enters the engine's filter system, the purifier delivers cleaner fuel, (virtually eliminating filter clogging) and therefore greatly extending maintenance intervals.

### Applications

- Aircraft fuelling
- Fuel docks
- Large pumping stations

### Optional

- 1/8" to 1/2" reducer (required for water sensor kit)
- Water sensor
- Water sensor kits

### RCI FP4000 Specifications

	Metric	US
Nominal flow	1514 L/min	400 gal/min
Sump capacity	26.5 L	7 gal
In and out couplings	4" NPT	
Top port	1" NPT	
Sensor port*	1/2" NPT	
Drain port	1" Drain	
Height	1943 mm	76.5"
Width	381 mm	15"
Gross weight	102 kg	225 lb

\*Water sensor kit optional
