

CAPABILITY STATEMENT

BACKGROUND

FTA Global t/a Filter Technology Australia (FTA) is a manufacturing company with their facility and head office located at Thornton, NSW.

In 2022 the company was acquired by Chris Wells, a dedicated longtime employee and Technical Operations Manager with over 25 years in the mining & manufacturing industries.

Prior to Chris taking the helm the previous owners, had extensive experience in a range of industrial businesses in coal mining, transport, quarrying, minerals refining, property, and construction engineering, all of which depend on the operation of industrial plant and equipment. This knowledge and experience helped mold FTA into the business it has become today.

Established in 1997 Filter Technology Australia was born with the vision to become a leading Australian manufacturer both in design, quality and cost effectiveness in the filtration industry. To this day, all components are still proudly Australian made.

Our mission is to develop and manufacture, safely and in harmony with the environment, high quality and innovative filtration products which has now been broadened to much more than filtration, to meet and exceed customer needs and expectations.

Through the continued involvement with businesses, across all industries, we have applied considerable focus to lowering operating costs, reducing unplanned stoppages of equipment and improving equipment performance over all.

The products developed by FTA Global have been installed in the various operating businesses across all industries with resounding success.

FILTRATION

FILTRATION IS AT OUR CORE

The core business of FTA Global is the design and manufacture of "ultra-fine" filtration systems for applications in industrial processes and equipment operation. Installation, service and ongoing support for FTA Global products is provided by our qualified service team and by a network of nationally appointed distributors.

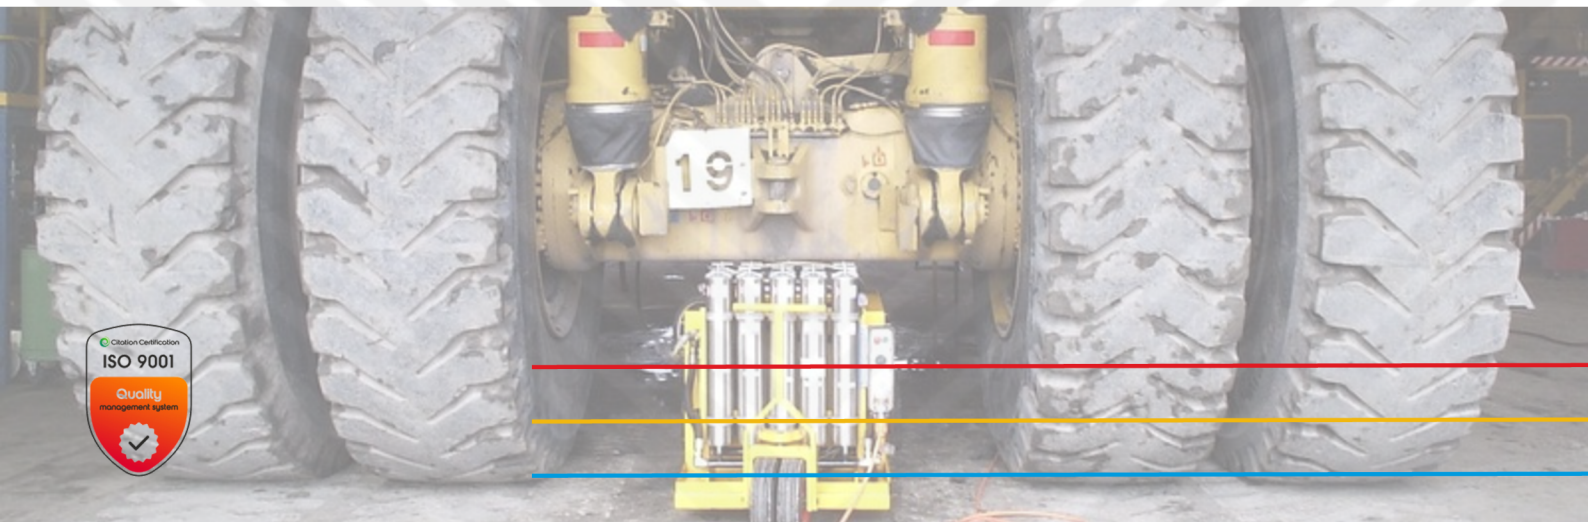

Filtration - FTA Global filtration systems deliver low cost and easy to maintain systems suitable for use in hydraulics, fuels, final drives, gearbox and engine oils. In this world of high component costs and expensive downtime, maintaining cleanliness is key to improved efficiency.

We can source and supply any other brand of filtration required for your business and can consolidate by forms of kits for each machine or vehicle to make it easy for your team.

Servicing - We provide on and offsite servicing, including but not limited to tank polishing, repairs, preventative maintenance, contamination control audits, oil sampling & analysis and onsite field services.

Manufacturing - FTA Global manufactures all of our filtration range in our factory in the beautiful Hunter Valley NSW. We deliver customisation to any of our filtration systems and build custom designed items for customers all over the world. Furthermore, we manufacture heavy duty lube dispensing systems and reel racks, workshop lube dispensing systems, and much, much more in close collaboration with brands such as Graco, Banlaw and Lincoln.

Hire - We have available a range of mobile filtration units as well as a range of hotwash trailers available for short or long-term hire. Hiring one of our units gives you the economy and flexibility to get the right size unit for the job, for as long as you require it.

WHAT WE OFFER

PROCUREMENT

Procurement - At FTA Global we have a team dedicated to locate, source and supply any hard to find parts and spares that most companies just don't have the time to chase but still need.

We offer the source and supply of complete filter service kits for onsite machinery.

We can be an asset to your team by making the painful parts easier.

We are distributors or resellers for:

- Lincoln
- Graco
- Banlaw
- Hydrau-Flo
- Air Sentry Desiccant Breathers
- Oilsafe
- Turbo Pre-Cleaners
- Flomax
- JSG Products
- Recoila Hose Reels
- Alemlube Dispensing Equipment
- Ebsray Pumps & Motors
- a variety of valving including Ball Valves, Check Valves
- Electrical equipment
- Fluid Transfer Live Sample boxes, and ALRS Systems
- Wash down nozzles
- Magnum Water Cannons
- RCT ToughEye Cameras
- Level Switches & Sensors
- Flow Switches & Flow Meters
- Hotco Heating Equipment
- Modulube Equipment
- Grease Dispensing Trolleys
- Solar TV's
- Heavy Duty Hot Wash Trailers
- And much much more

WHAT WE OFFER

MAINTENANCE

Maintenance - Expanding on our manufacturing services over the past few years, we now also offer onsite infrastructure maintenance and offsite rebuilds and maintenance on service trucks and water cart modules.

Our team of service technicians are trained in all facets of Infrastructure maintenance, including but not limited too:

- Hydrocarbon Management and Auditing
- Cleaning
- Inspections
- Problem solving and diagnosis
- Pipework Installation
- Pumping
- Hose Reels
- Fuel Management System Maintenance eg: Veridapt
- Manufacture & installation of LV Wash Bay systems

We complete grease system services including injector inspection, auditing and maintenance.

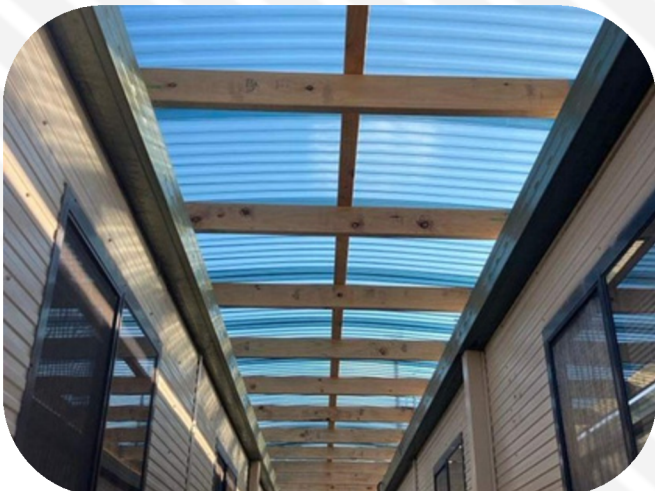

WHAT WE OFFER

BUILDING MAINTENANCE

Building Maintenance - We have a team of carpenters to ensure all your building repairs and maintenance can be taken care of and deliver a large range of services including but not limited to:

- Deck Repairs
- Concreting
- Pathway Maintenance
- Roof and Guttering
- Awnings
- Building Repairs
- Office Fit Outs
- Igloo Construction & Installation
- Door Repairs & Maintenance
- Retaining Walls and Aggregate Backfill
- and any other building and construction jobs you may require.

Electrical - FTA has an in house electrician qualified to complete all industrial electrical requirements including manufacturing electrical boxes, through to supplying and installing cabling

WHAT WE OFFER

MANUFACTURING

Manufacturing - For over 27 years, FTA has centered its efforts on manufacturing. We have expanded our offerings beyond filtration equipment to include a wide range of industrial equipment, enabling us to better service our customers across various sectors

- Reel Racks and "Salad Bars"
- 1000L IBC Oil & Coolant Recovery Systems
- Light Vehicle Wash Bay
- Oil Dispensing Systems
- Bulk Filling Stations
- Bulk Filtration Stations
- LV Vehicle Stations
- Waste Strainers
- AdBlue Dispensing Cabinets
- Workshop Lubrication Dispensing Systems
- BBQ Containers

A legacy of excellence

PROJECTS

SIGNIFICANT PROJECTS

FTA Global have been involved in a number of significant projects as a part of our growth.

Moolarben Coal Operations -

2020 - FTA successfully secured the tender to manufacture the Fill Station, Filter Station and Light Vehicle Station for Moolarben Coal Operations. This project included the supply and install of the stainless steel pipework which that connects these stations through OC1 Fuel Farm and into the workshop and fill bays.

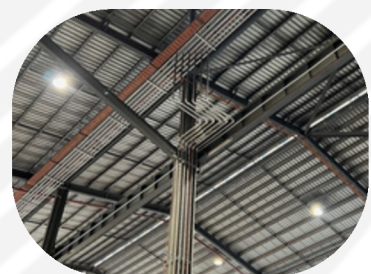

Mount Thorley Warkworth

2023 - FTA were approached to tender on the manufacture of Portable Grease Dispensing Systems and Reel Racks for Mount Thorley Warkworths new workshop. The project involved a total of 3 Grease Systems and 3 Reel Rack/Salad Bars.

Mount Thorley Operations

2024 - Building on the success of the MTW project, MTO reached out for assistance with their workshop refurbishment. This project included 3 reel racks and the supply and installation of stainless steel pipework through the workshop.

MANUFACTURING

MORE THAN JUST FILTRATION

FTA Global, commonly referred to as FTA or Filter Tech, has been a trusted name in filtration manufacturing for over 27 years.

Filtration is the core of our business and you may have come across our iconic stainless steel filter housings on mine sites, trucks and in various industries across Australia and worldwide. Our cutting-edge systems are designed to extend component life, reduce fuel and oil costs, enhance injector durability, and minimize emissions.

In recent years, FTA has broadened its capabilities to meet a wider array of custom manufacturing needs. If you can envision it, we can make it a reality.

CUSTOM MANUFACTURING & 100% AUSTRALIA MADE

FTA Global is proudly 100% Australian owned and operated with over 27 years of manufacturing in Australia. FTA's products are manufactured to the highest quality standards and are fully compliant with ISO 9001. In keeping with one of our core values, FTA Global is committed to supplying only quality goods and services to all our clients.
